Aminoforte

General plant fertilizer

Calculate the liters of your aquarium:

Length x width x height and divide by 1000.

Dosage: 8ml (doser) per 80 liters.

Or 25 drops per 10 liters.

Shake lightly before use.

Add: the appropriate dose every week

Or depending on the photoperiod, intensity,

number of plants or CO2
supply.

Ideally add the dose at the start of lighting

And reduce excessive aeration.

Let 1-2 days pass before adding

other chemicals to the aquarium.

Once opened, it remains useful for 1 year.

T I p: In aquariums with a water PH lower

Of 8.0, plants absorb inorganic Iron better.

However, this product also contains organic iron!

Contains: Iron chelated DTPA= O,1%, Ferrous gluc.= 0,1%, K =600mg, Mg= 96 mg, S , B=8mg,CL,CU=4mg, Mn =20mg,Mo=2mg, Na, Zn= 2mg, Ni= 0,5 mg, Li= 2 mg, Se= 0,40 mg, I=12mg, aminoacids,+Distilled water.

Stabilis.,EDTA,DTPA >0,1%.

Available: www.enydor.gr

Num. Protocol : 30/004/000/138/2015

Product code: 1932884

100ml e Enough for 1000 liters.

Aminoforte contains all the elements that nature requires for the healthy growth and longevity of freshwater aquarium plants.

It is concentrated and enriched with amino acids so that plant cells can more easily bind nutrients without spending valuable energy.

It also activates their natural mechanisms by functioning as a biostimulator to counteract any other factors that negatively affect them.

It does not contain Phosphates and Nitrates while the Potassium it contains comes from 3 different forms + one organic form!

The remaining elements are formed into complexes so that they are absorbed as long as possible.

Suitable for tropical and cold-water ornamental fish.

Store this bottle in a shady and cool place (4-30 C) and away from children, pets and food.

CAUTION: Stains skin and fabrics.

Poison Control Center Greece Tel.: 2107793777 for Cyprus : tel. 1401
