100ml e

Enough for 500 liters.

This product effectively combats bacteria (gram positive, gram negative) and fungi (Saprolegnia, Achlya) that attack the gills, fins, skin, eyes, mouth and urethra of fish.

In the infected areas, the fungus is visible like cotton that spreads, leaving necrotic tissues

that are attacked by bacteria.

Dead fish that have been infected with mycosis are found "cocooned".

The preparation is safe for aquatic plants and cold water and tropical fish but NOT for shrimps of the Neocaridina type etc...

Ensure good oxygenation and remove the activated carbon before use.

Turn off UV or ozone devices.

Some species may respond sensitively to the product
such as elephant fish, shrimp, snails, piranhas etc
